

# Popcorn

## My Five Senses

**The popcorn sounds, smells, looks, feels, and tastes....**

A super fun activity related to “My Five Senses” is related to popcorn. At home, you can make some popcorn and discuss how it sounds while popping, smells when oh-so-freshly-made, looks, feels, and tastes.

When you’re eating the popcorn, you can help your child describe the taste. On Friday, we will be having a “taste” test for our science session and details regarding this will be in the weekly email.

Cheers,  
Ms. Kim
