SUMMER
2015

NOW REGISTERING FOR AUGUST 2015: ICKY STICKY SCIENCE!

We have some super fun science activities planned for August Tiny Tots at the Poway Community Park, so we hope you'll join us! Our classes are 9am-12pm on MW and T/Th; cost is \$180/month for two mornings or \$360 for four mornings.

The first week (August 3-6) will focus on Chemistry and we'll be making some slippery slime, bubbly bubbles, fake snot (what?!?!), and we'll see what happens when we mix oil and water! The next week (August 10-13) we will delve into some ancient archeology with a cool kinetic sand project; then, we'll make a few geological wonders such as volcanoes, crystals, and our very own coal! The third week (August 17-20) we will focus on wondrous weather; projects will include learning about and creating snow and hail as well as learning about rainbow science and the powers of wind. Finally, the last week of summer (August 24-27), we will celebrate botany and entomology with projects featuring soil, sand, plants, flowers, butterflies, beetles, ladybugs, ants, and so much more!

Of course, we will continue to work on our letters, numbers, and writing our names (practice makes perfect!). And, many of our new Busy Boxes correlate with our August science projects - ask your child for details!

For outside play, we're on the playground or in the large field on two separate occasions for a total of 30-45 minutes per morning so please sunscreen your Tiny Tot prior to class - thank you!

Our last Tiny Tots class for Summer 2015 will be on August 27. Then, Fall session will begin on September 15 with a focus on "All About Me".

Lastly, remember we're a nut-free class - thank you! :)

Tiny Tots class is designed to help preschoolers (ages 3-5) get ready for "real" school. Miss Kim and the Hopscotch staff offer a well-rounded curriculum that includes art, music, movement, science, language arts, pre-math, and pre-reading. The Tiny Tots class provides a fun and safe atmosphere for children to socialize with others both indoors and outdoors, learn how to stand in line, participate in circle time, and the list continues!
